# Office Action Summary

Application No.  
**09/782,420**

Applicant(s)  
**Shangold et al**

Examiner  
**R.S. Travers J.D., Ph.D.**

Art Unit  
**1617**

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

## Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136 (a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☒ Responsive to communication(s) filed on Feb 6, 2003
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11; 453 O.G. 213.

## Disposition of Claims

- 4) ☒ Claim(s) 18-22 is/are pending in the application.
- 4a) Of the above, claim(s) \_\_\_\_\_ is/are withdrawn from consideration.
- 5) ☐ Claim(s) \_\_\_\_\_ is/are allowed.
- 6) ☒ Claim(s) 18-22 is/are rejected.
- 7) ☐ Claim(s) \_\_\_\_\_ is/are objected to.
- 8) ☐ Claims \_\_\_\_\_ are subject to restriction and/or election requirement.

## Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on \_\_\_\_\_ is/are a) ☐ accepted or b) ☐ objected to by the Examiner.  
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) ☐ The proposed drawing correction filed on \_\_\_\_\_ is: a) ☐ approved b) ☐ disapproved by the Examiner.  
If approved, corrected drawings are required in reply to this Office action.
- 12) ☐ The oath or declaration is objected to by the Examiner.

## Priority under 35 U.S.C. §§ 119 and 120

- 13) ☐ Acknowledgement is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).  
a) ☐ All b) ☐ Some\* c) ☐ None of:  
1. ☐ Certified copies of the priority documents have been received.  
2. ☐ Certified copies of the priority documents have been received in Application No. \_\_\_\_\_  
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).  
\*See the attached detailed Office action for a list of the certified copies not received.
- 14) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. § 119(e).  
a) ☐ The translation of the foreign language provisional application has been received.
- 15) ☐ Acknowledgement is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

## Attachment(s)

- 1) ☒ Notice of References Cited (PTO-892) 4) ☐ Interview Summary (PTO-413) Paper No(s). \_\_\_\_\_
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948) 5) ☐ Notice of Informal Patent Application (PTO-152)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449) Paper No(s). \_\_\_\_\_ 6) ☐ Other:

Art Unit:

The amendment filed January 6, 2003 has been received and entered into the file.

Applicant's arguments filed January 6, 2003 have been fully considered but they are not deemed to be persuasive in view of the newly presented rejection.

Claims 18-22 are presented for examination.

The following is a quotation of 35 U.S.C. § 103 which forms the basis for all obviousness rejections set forth in this Office action:

A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Subject matter developed by another person, which qualifies as prior art only under subsection (f) or (g) of section 102 of this title, shall not preclude patentability under this section where the subject matter and the claimed invention were, at the time the invention was made, owned by the same person or subject to an obligation of assignment to the same person.

Claims 18-22 are rejected under 35 U.S.C. § 103 as being unpatentable over Bergink (415) in view of Darney et al and Alapiessa et al, of record, or newly cited.

Bergink (415) teaches the claimed compounds as old and well known in combination with various pharmaceutical carriers and excipients in a dosage form.

These medicaments are taught as useful for contraception employing triphasic dosage

Art Unit:

forms. Bergink teaches triphasic combined oral contraceptive methods, compositions and kits substantially similar to those herein claimed, as old and well known in the art (see abstract, claims, and pages 4-9). Claims 18-22 and the primary reference, differ as to:

- 1) administration levels of the medicaments, and
- 2) the employment of these medicaments in a 21 day regimen

Determining the active ingredient dosage level required to effect optimal contraceptive benefit is well within the Skilled Artisan's purview and the benefits of achieving such maximization obvious, to said skilled artisan. In the instant case Darney et al teach, based on a published report (Johns Hopkins School of Public Health: IUDs- An update *Population Reports* 1995. XXII(5). Series B) oral contraceptives containing ethinyl estradiol at levels greater than 20 micrograms provided a lower incidence of breakthrough bleeding and spotting as compared to higher levels of ethinyl estradiol (Darney et al, page 2, paragraph bridging columns 2 and 3). The claims merely recite the obvious employment of old and well known active ingredients, carriers and excipients. Thus, the only issue presented in the instant application is the obviousness of the claimed contraceptive methods, and compositions.

Art Unit:

Bergink teaches employment of a contraceptive regimen in a triphasic 24 day cycle. Alapiessa et al teach the employment of ethinyl estradiol at levels greater than 20 micrograms in combination with desogestrel at levels herein recited administered in a 21 day regimen. The skilled artisan would be motivated to employ this 21 day regimen by Bergink (page 2, line 4) teaching the persistent attempts by those in the field of contraception to "lower the total steroid dosage" in any contraceptive regimen.

Thus, in the instant case, numerous motivations exist to modify the Examiner cited prior art into the presented invention. Possessing these teachings, the skilled artisan would have been motivated to employ ethinyl estradiol at levels greater than 20 micrograms provided a lower incidence of breakthrough bleeding and spotting thereby rendering the presented claims obvious.

No claims are allowed.

Any inquiry concerning this communication should be directed to Russell Travers at telephone number (703) 308-4603.
